Goals:

Learning to sing with good technique can be challenging but rewarding. Goals students may have while studying voice include learning to use healthy technique, growing in musicality and confidence, and learning new music and preparing for competitions.

It should be understood that taking lessons does not guarantee first place at contest or the lead role in musicals. However, with consistent practice, hard work, patience and the willingness to learn a student's singing skills will greatly improve.

Practice:

This is the most important aspect of learning to sing with good technique. Technique will be taught at the lessons but daily practice is a must to put the technique into practice. It is suggested that students practice for 30-45 minutes four to five times per week.

Scheduling Lessons:

Students will receive one-half hour lessons weekly. Sessions are seven weeks in length, with one make-up lesson offered after the seventh week. Any lessons missed by the instructor will be rescheduled.

Books:

Students are responsible for purchasing or providing their own music. The instructor will provide guidance in this area. If a student wishes for the instructor to order music for them a \$2 fee will be added on to the cost of each music book ordered. School contests require two original copies of each song.

Payment:

Cost per each lesson is \$12.00. Payment is expected at the first lesson of each session for the entire seven weeks for a total of \$84.00. Lessons must be canceled twenty-four hours in advance to receive reimbursement for the missed lesson. If payment is not received by the second lesson then lessons will be suspended until it is received.

If you have any questions, please contact me at home or by email. Thank you!
